[EPA NOL NCCW GP 02132014.pdf](#)

Scott and Sean –

Awhile back we rec'd the attached letter from EPA Region 5 concerning our pre-PN draft GP for NCCW. It is my understanding that the new 316(b) regulation now is applicable to all intake structures and no longer exempts those intakes less than 2 MGD. If this is the case, then how does EPA see that being handled for the GPs for those with intakes less than 2 MGD? I think this will be a big surprise to the states and those impacted, it was to us.

Thanks.
